

# VEHICLE INSPECTION REPORT PRODUCTS

Are you having trouble getting delivery from your manufacturer. We carry many manufacturer's vehicle inspection reports. Forms are printed in full color and will be identical to the ones you are currently using. These forms are periodically updated and picture above may not be most current version. Please check with us for availability and pricing of most recent updates. We try to maintain the most current version as it is completed. New Chrysler version is not shown above. However, we have this version available for sale. Also, our Ford version, because of legalities exclusive to Ford, does not have logos at top of form. We do carry the latest Ford version with a generic header (top left). This version also works well for those multi-line dealerships who want to use only one version of the form for all makes and models. It is also recommended for our general service facilities who want to offer a comprehensive vehicle inspection report to their customers. Forms come packaged 250 sheets per pack. All forms are stock. Call for availability if imprinting is desired.

**Current manufacturer's version available are as follows:**

**Ford (Generic), Chrysler, General Motors, Toyota, Honda, Acura, Mazda, Scion**

If you are looking for other manufacturer's versions please check with us. It may have been added to the line, but not to this catalogue.
